

A Street Through Time

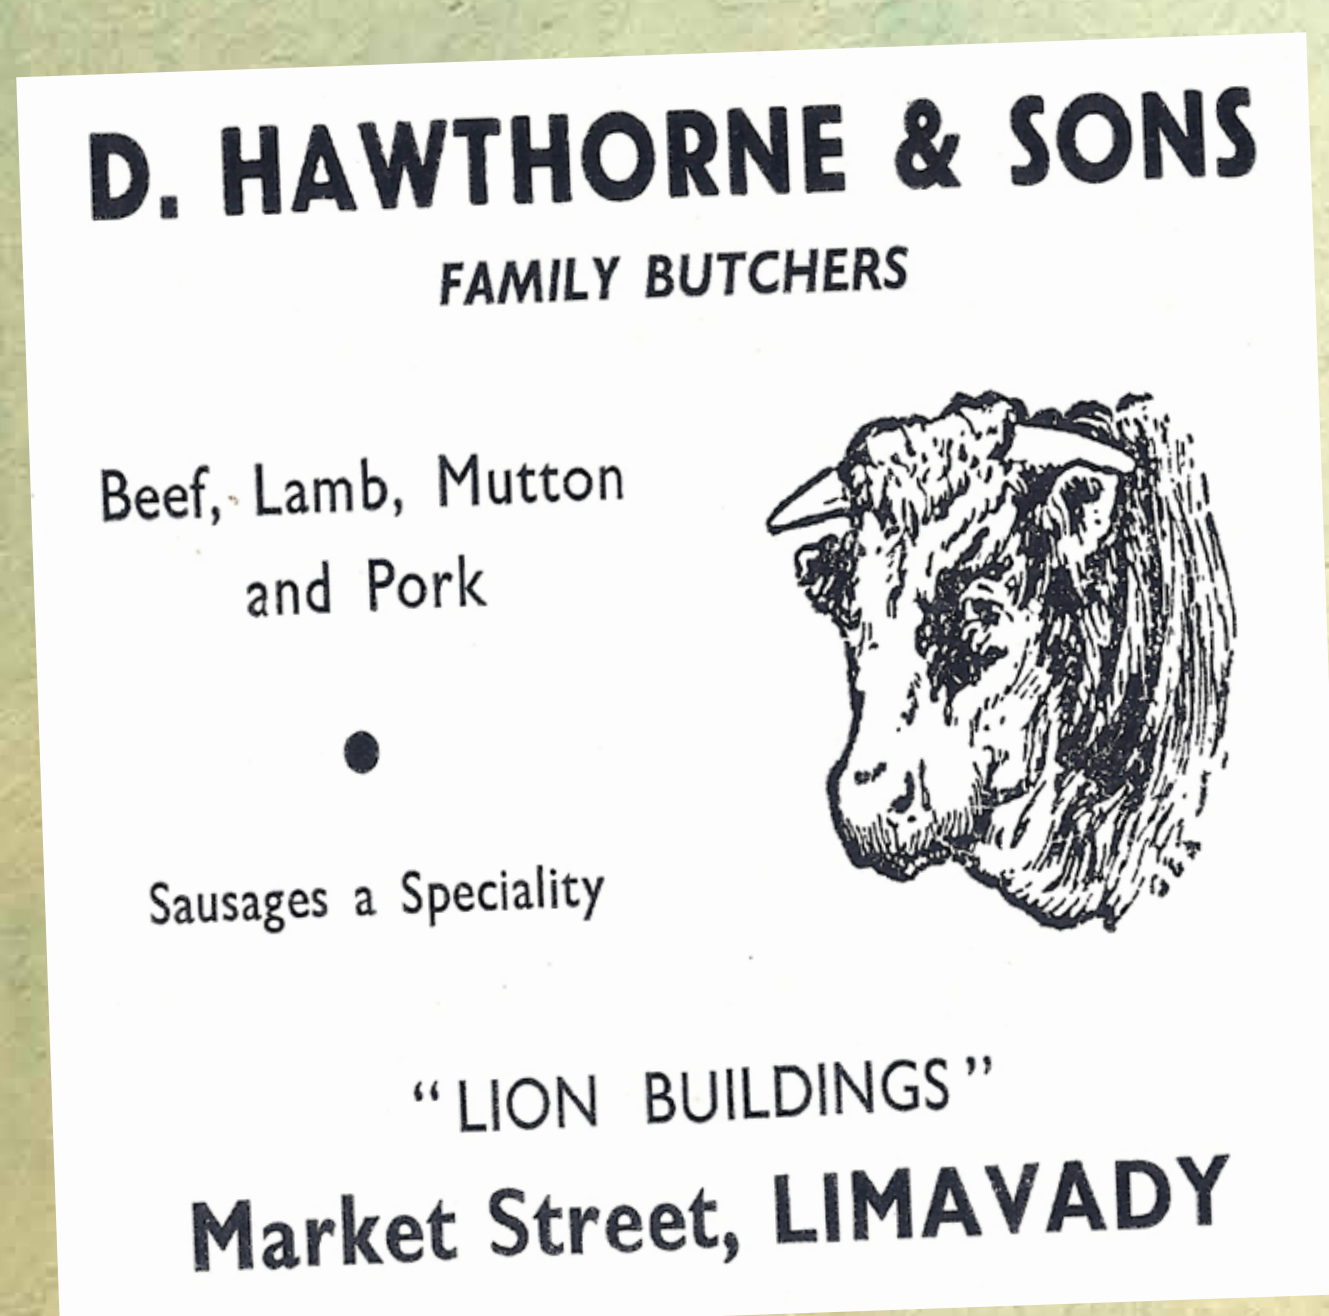

A Journey along the Limavady High Street

There is a great importance in researching and recording the changes of our High Street and it is with this project that we hope to encourage people to reminisce about the local town, the people who worked in it and the changes they have seen. This exhibition is merely a starting point of an ongoing larger project to gather more information and artefacts on the shops of Limavady. This exhibition has been developed to gather memories from those who ran and those who shopped at the traditional Butcher, Bakers and Greengrocer shops of the time and share views on what we have lost due to modern changes.

If you have any photographs, objects or written memories which you would like to share, Limavady Museum would be very keen to see them.

Market Street, Limavady, mid 1900's.
